The combined forces of wealth are often can be defined from the passes of the prize of the controlling the legislation of the country even against the will of the great body of the middle and lower classes, constituting at least forty millions of people. And retained the visit of the process of the prize to determine the middle and lower classes. The record of the last Congress is already ce ved the substantial endorsement of President Cleveland who labored hard to seet refor it the support of the very few Democrats not willing to accept the free trace policy of the majority. He had personal interviews with members of the party and brought the influence of his great office to bear in behalf of the bit. When office to bear in behalf of the bil. When Mr. Morrison attempted to secure a consideration of his measure in the House he substituted and their valor saved! was defeated by a vote of 157 to-140. An analysis of this vote shows that the great bull of the Democratic members supportarrayed in almost a solid phalanx in op-position to it. The following is the record In favor of the bill. Democrats 136. Republicans 4; opposed to the bill, Repub icans 22, Democrati 35.

The representative organ of the Democ-

racy in this State, the Bortland Argus, has positively asserted that the garty dishe lieves in the "humbug proteotion." and the record of the Demogratic majority in Congress points to the same conclusion. This fall the laboring men of Maine will have an opportunity to a reay themselves on the side of one or the other of the great parties-the one standing for free scade which, as shown above, means low wages and the other presenting a so'id front in favor of protection, which, as demonstrat ed by the statistics quoted, has proved so beneficial to the laboring classes of Massachusetts, and what is true of that State is equally rue of Mane. We believe they will be found voting for the protection of

The Third Party Movement. The Democratic papers are just now engaged in singing the praises of Gen. Neal Dow on : count of his rem rk that "we [the men.bers of the third party] are gong to ke I the Republican party." Gen. same. The fact is the great bulk of the consistent temperance people throughout the State do not prepose to lend hem-selves to a movement the on y possible effect of which would be to turn the administration of affairs over to the Lemocruts, the sworn enemies of the tempe ance cause. In September next the people will elect the rthe candidates of the Republican party or the candidates of the Democratic party. The former organization has a record ir support of the princip es of temperance that even the most fanatical member of the third party movement cannot belittle. while the latter has as steadily opposed all temperance legislation. This being the fact the real friends of the cause will enderse the following views of Major H. A. Shorey, editor of the Brilgton News. and for years a temperance leader in the State, nather than follow the leac of Gen. Dow, whose only aim see as to be to kill the Republican party regardless of the ef-

excellent opportunity to study at close range the Democratic idea of administering the Government and his remarks on this subject will be both instructive and highly interesting. This will be the opening rally of the campaign in this city and our Senator'should be given a rousing welcome.

The Democratic Free Trade
Record.

On the tariff question the Republicans have no issue, except as they menufacture one since the Democrats have refused to touch the matter.

The above rather remarkable statement appeared in the columns of the Boston following in an editorial referring to the is-

When Cobden framed his free trade bill be took it for granted that other countries would respond, but the contrary has been the case. We urge the government to examine the question thoroughly with unbiased spirit and with the purpose of reschiding free trade as now constuted.

This is persinent test mony from a paper that has had ample opportunity for study ing the practical effects of free trade, and is worthy the careful attention of the voter of this country. This issue is sharply drawn between the Republican and Democratic parties, the latter being to-day on record as favoring the establishment of free trade upon the workingmen of that the free trade policy in the United States. while the former is outspoken in suppor of the protective system under which this

Our Shipping.

The Arms is unmindful of the facts when it charges that the protective tariff has destroyed our shipping in the foreign trade. The decline in our foreign carrying trade was as great in the revenue tarif period between 1855 and 1861 as in any five vears since the war, under motection Even the duties on the materials used in constructing vessels, when imported, were as much under the revenue tariff of 1846 as an der the present protective tariff Under the revenue tariff of 1846, every thing used in the construction of vessels paic a duty when imported. New all tim ber, iron rods, bars and bults, copper maril a, wire rope, and marry other arti cles used in the construction equipment and repairs of vessels for the foreign trade are admitted free of duty by the present protective tarift. Secretary Bayard.

When the Baltimore Sun published, something more than a weet igo, what purported to be an interview with Secrecary Buyard, there was a general feeling even on the part of his political opponents that it could not be genuine, or that if an nte view had been had, that the interviewen had most incorrectly reported him. It harrly seemed possible that the American Secretary of State cou'd so far forget the dignity of his position as to include in talk like the following:

Wicket Oven Door with Pedal A tachment and Perfect Ventilation, Secured with Fresh Air from Ontside.

These velluble improvements can be applied to all Royal Clarion Ranges.

The Pedal is so arranged that the even door can be thrown open with a slight touch of the foot, saying the use of hand or holder (as the door knobs are always hot). The Wicket Door is made to drop, and forms a shelf (as seen in the above cut). This Wicket Door will be found useful in the process of balding or roasting to open and see how the work is being done without detriment to the article being cooked, and in roasting, basting can be done without cooling the oven to any perceptible degree. The ventilation at the top of the oven door in connection with the oven ventilation at the top of the oven door in connection with the oven ventilation at the top of said of even, as applied to our Royal Clarlonf makes a completely ventilated oven, and for practical use the most perfect baking oven known to man. This production of 1886, with our many improvements, make the Royal Clarlon Ranges the most desirable ever put upon the market.
